### **Interesting facts about painting with Gutta paint**

Gutta lines serve as a separating agent between the individual silk painting surfaces. In coloured version they are visible contours, transparent gutta can be washed out without residue after silk fixation. When painting the gutta contours, care should be taken to ensure that the silk is not damaged by the Dosing tip "separation line" and that the gutta really soaks through the silk fabric so that no silk paint really seeps through this "separation line" later
